BREEDER

ORGANICALLY CHELATED TRACE ELEMENT,  
VITAMIN AND AMINO ACID SUPPLEMENT

 **Agri-Lloyd**  
THE SECRET'S IN THE SCIENCE®

## ORGANICALLY CHELATED TRACE ELEMENT, VITAMIN AND AMINO ACID SUPPLEMENT

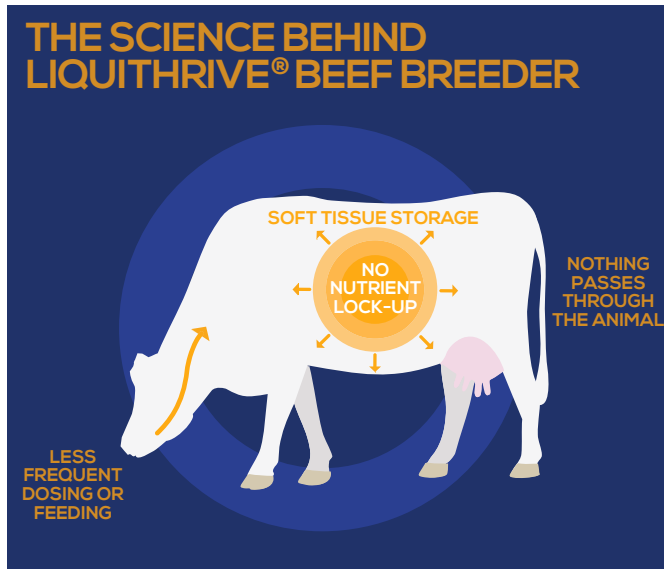

Liquithrive® Beef Breeder is an organically chelated trace element, vitamin and amino acid supplement for both commercial and pedigree beef cows.

It is designed to provide beef cows with the resources necessary to improve fertility, achieve a tighter calving pattern, enhance calf viability and increase performance and production.

Liquithrive® Beef Breeder is formulated based on the clinically known needs of beef-breeding cows with a high bioavailability of micro-nutrients to correct nutritional imbalances.

A high level of bioavailability means that trace elements and minerals are absorbed in the small intestine and stored in the soft tissue creating a reservoir of nutrients to be used when needed.

## THE SCIENCE BEHIND LIQUITHRIVE® BEEF BREEDER

Liquithrive® drenches are designed to balance trace element, vitamin and amino acids meeting the animals requirements in advance of periods of stress such as:

- Pre calving
- Turn out
- Pre bulling
- Housing

Liquithrive® Beef Breeder is best used in conjunction with a traditional mineral supplement to ensure cattle have a solid foundation of base minerals at which time, Liquithrive® Beef Breeder should be used to correct imbalances.

Achieving overall balance and creating high bioavailability is more important than correction of specific imbalances, or, over correction caused by flooding the body with too much of a certain mineral.
